ABOUT MICROCMENT

Microcement is a cutting-edge, polymer-modified coating system that allows applicators to transform any surface with a continuous, joint-free finish. Applied in layers of just 2–3 mm, it provides a modern minimalist aesthetic while delivering exceptional durability and performance.

This innovative material adheres to nearly any substrate, including tiles, marble, concrete, MDF, plaster, metal, and existing finishes—making it ideal for both new construction and renovations without demolition.

What is Microcement?

Microcement is a modern decorative coating applied in thin layers (2–3 mm) to create seamless surfaces with a luxurious handcrafted finish. It can be applied over tiles, marble, concrete, wood, and most existing substrates without demolition.

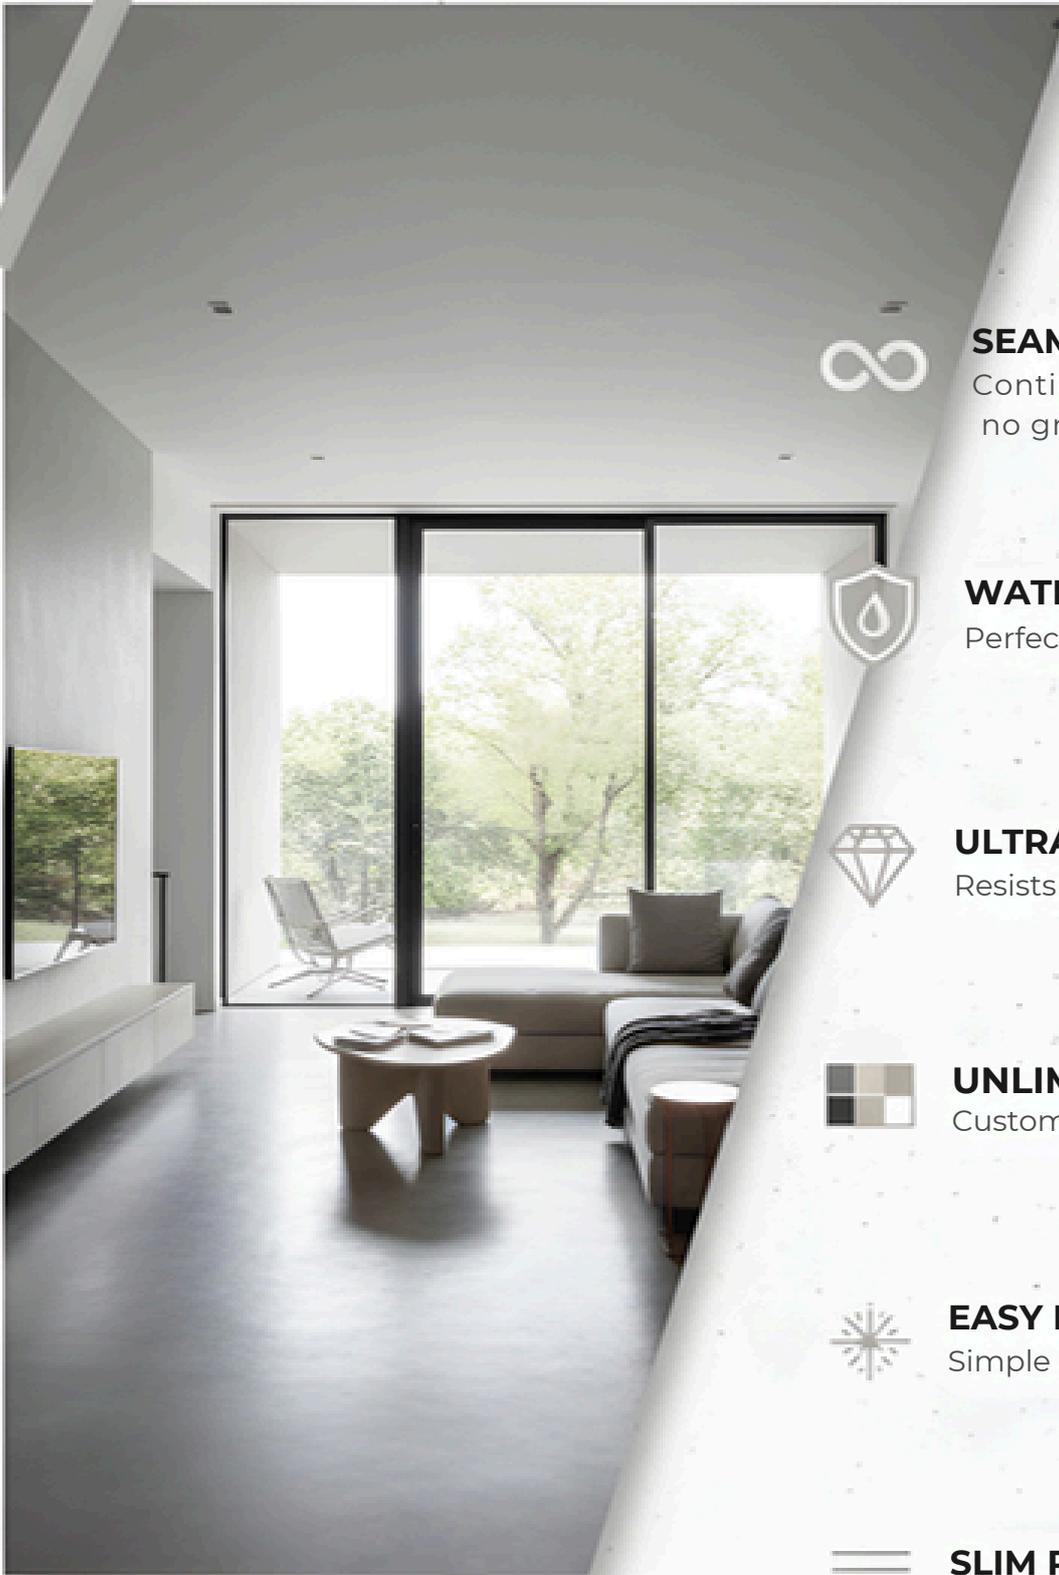

Key Applications:

- Floors
- Walls
- Kitchens
- Bathrooms
- Staircases
- Furniture & Countertops

Why Choose Microcement:

It combines the elegance of natural materials with the versatility of modern finishes.

FEATURES & BENEFITS

SEAMLESS DESIGN

Continuous surfaces,
no grout lines

WATERPROOF

Perfect for bathrooms & kitchens

ULTRA-DURABLE

Resists heavy traffic & impact

UNLIMITED COLORS

Custom hues for any vision

EASY MAINTENANCE

Simple cleaning, lasting beauty

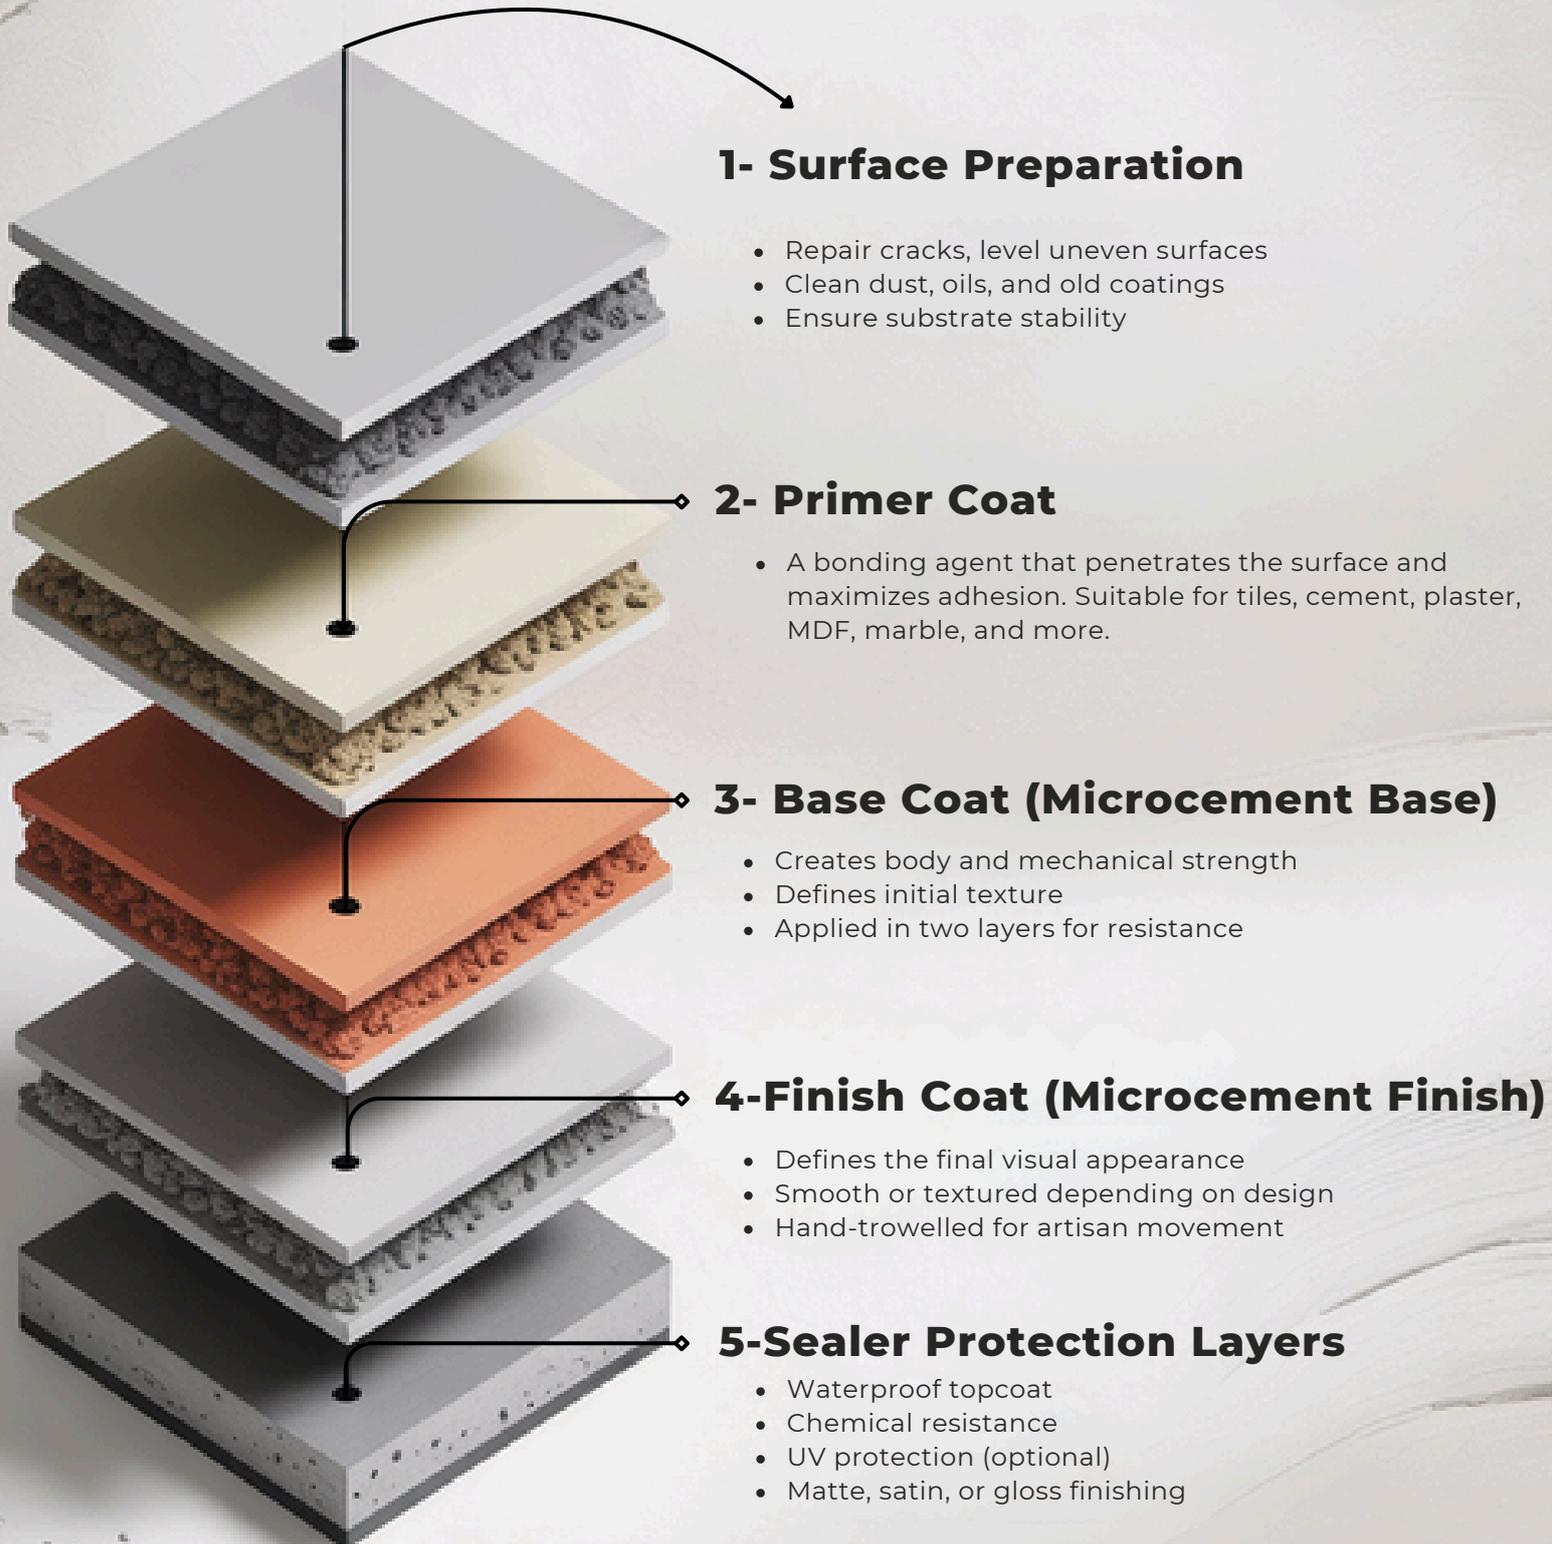

SLIM PROFILE

Only 2-3mm application

Microcement System Layers

Total System Thickness: 2–3 mm

Expected Lifetime: 10+ years with correct maintenance.

MAINTENANCE & CARE

Daily Cleaning

- Use mild soap with water
- Microfiber cloth recommended
- Avoid abrasive powders or acidic products

General Guidelines

- Do not drag heavy furniture
- Use soft padding under table legs
- Clean spills quickly
- Reseal every 2–3 years for maximum protection

Expected Lifetime

Microcement can last 10–15 years when maintained properly. Suitable for high-traffic areas and commercial use.

Technical Data Sheet

MECHANICAL PROPERTIES

Compressive Strength	>40 MPa	
Adhesion	>2.5 MPa	
Flexural Strength	>8 MPa	
Flexural Strength	>8 MPa	
Abrasion Resistance	<20 mm ³	
Slip Rating	R10-R11	

ENVIRONMENTAL CONDITIONS

Application Temperature	10-30°C	
Humidity	<75%	

APPLICATION DATA

Drying Time	24-48 hours	
Consumption	2.5-3 kg/m ²	
Thickness	2-3 mm	

IDEAL FOR:

- Homes
- Commercial spaces
- Hotels
- Cafes
- Villas
- Retail stores
- Modern renovations.

FEATURES & BENEFITS:

- Seamless, joint-free finish
- Waterproof & moisture-resistant
- High durability & scratch-resistant
- Suitable for floors & walls
- Fast application with minimal demolition
- Wide range of textures & colors
- Works indoors & outdoors
- Easy to clean & maintain

Classic Smooth Collection

Soft neutral tones for modern minimal interiors.

Colors Include:

C01 Deep Carbon Black

Textured Stone Collection

Stone-inspired textures with natural depth.

Colors Include:

T01 Terracotta Granite

T02 Moss Stone Green

T03 Steel Ash Blue

T04 Mudstone Brown

T05 Desert Clay Light

T06 Charcoal Mineral Grey

Designer Colors Collection

Artistic, bold, and expressive tones.

Colors Include:

D01 Dusty Clay

D02 Soft Bone Beige

D03 Sage Stone

D04 Petrol Blue

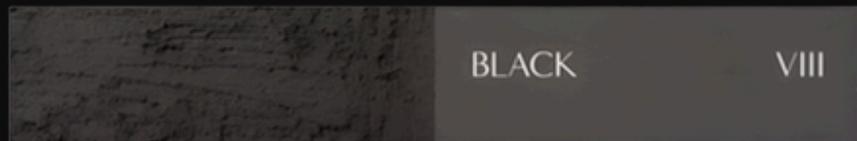

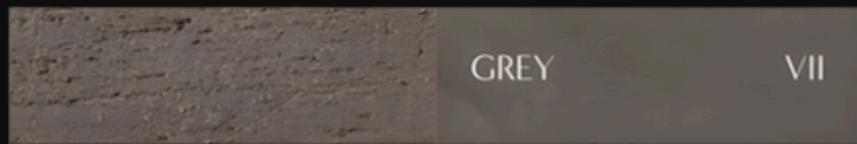

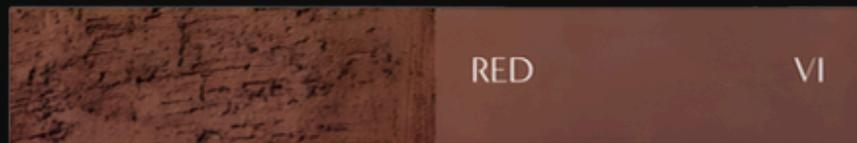

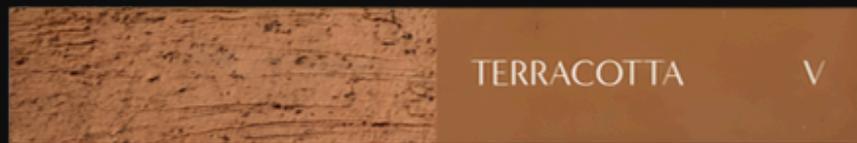

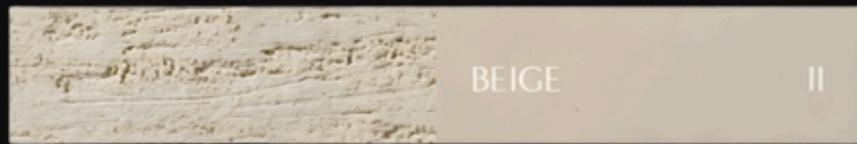

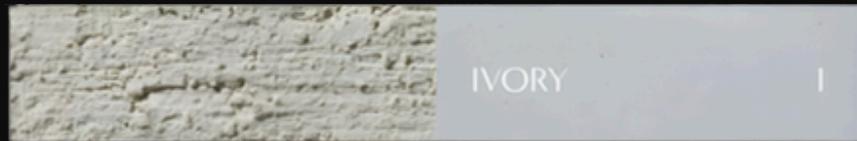

D05 Burnt Rust Oxide

D06 Terra Iron Brown

Linen Effect Colors Collection

Artistic, bold, and linen tones.
Colors Include:

Terrazzo Fusion Collection

Microcement mixed with decorative stone chips.

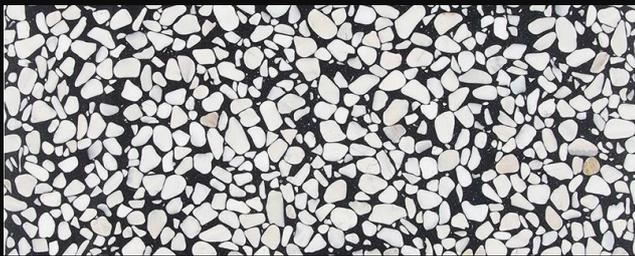

Colors Include:

F01 – Driftwood Mix

F02 – Crushed Granite

F03 – Black of Night

F04 Pastel Fusion

F05 Stone Beige Mix

F06 Morocco Terra

Terrazzo Fusion Collection

Microcement mixed with decorative stone chips.

Colors Include:

F07 Marble Blend

F08 Night Granite

F09 Charcoal Pebble

F10 Blue Frost

F11 Olive Moss Terrazzo

F12 Oyster Shell Grey

Rocky Collection

Microcement mixed with decorative stone chips.
Colors Include:

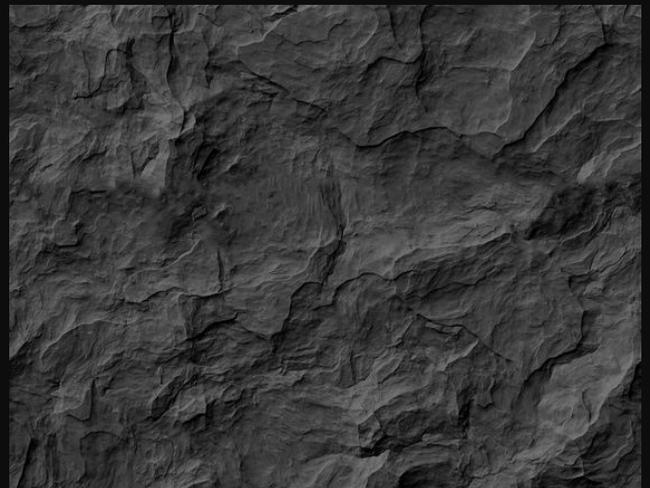

R01 – Slate Grey

R02 – Desert Rock Taupe

R03 – Limestone White

R04 – Charcoal Basalt
